

Transpose

To also transpose the name of the key in section titles and annotations, you must include them with square brackets [].

ex 1 - Using square brackets

This example is in the key of G

<i>The tonic is G</i>	<i>C is the subdominant</i>	<i>the dominant is D</i>	<i>and Em is the parallel minor</i>
G	C	D	Em

ex 2 - Without square brackets

Attention, now only the chords are transposed correctly.

This example is in the key of G

<i>The tonic is G</i>	<i>C is the subdominant</i>	<i>the dominant is D</i>	<i>and Em is the parallel minor</i>
G	C	D	Em

Tip #1

Use the transpose button to see the effects

Tip #2

Change fonts to use the correct accidental symbols

sharp: # =>♯, flat: b =>♭

The standard fonts used unfortunately lack these.
