

Double Bar Line

There's no rule without exceptions. In ChordSheet, you usually don't need delimiters between bars. However, when you want to clearly separate musical sections, a double bar line becomes useful.

Implicit using a section title "="

Part A

```
|| A | B | C | D ||
```

Part B

```
|| B | C | D |
```

Explicit using a double pipe symbol "||"

At the beginning

```
| A | B | C | D |
| B | C | D |
```

At the end

```
| A | B | C | D |
| B | C | D |
```

In Between

```
| A | B | C | D |
| A | B | C | D ||
```
